Led by Masashi Minagawa
& Gianni Rossi (head of Shintaido Italia)

Whenever we see a beautiful painting, hear a wonderful piece of music or gaze in wonder at the nature around us our spirit is stirred and we feel a deep connection that moves us. We catch some universal meaning that is expressed by the artist or performer, or feel awed by our place in nature. It has been said that this ability to reflect and be moved is unique to human beings and is a way of the Universe coming into consciousness.

I believe that the practice of Shintaido develops this sensitivity in us, sharpens our senses and helps us to connect more deeply to each other. There is such variety in Shintaido practice, that everyone can find some kind of keiko that inspires them and brings them joy. During this Daienshu we are delighted to have the chance to once again receive the gorei of Gianni Rossi, senior instructor from Italy and of our own inspirational Master, Masashi Minagawa. So, let's enjoy each other's company and practice warmly and sincerely as friends, to create a positive life.
